

SCIENCE & SUPERHEROES

2018 NC Science Festival Contest

Sponsored By

Spandex City & Discovery Place

Did you know that many of our favorite comic book superheroes owe their superpowers to science, technology, engineering, and math (STEM)?

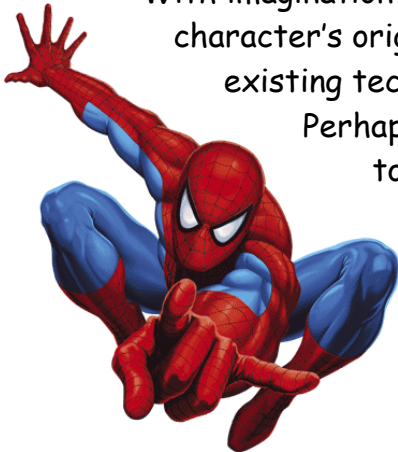

The "Science & Superheroes" contest challenges students in grades K-12 to use the power of STEM to invent original superheroes who solve real-world problems!

With imagination and research, you can rely on any field of STEM to come up with your character's origin and/or superpower. You might discover an existing technology that has a superheroic application.

Perhaps a known math or scientific principle inspires you to create something new! From algebra to zoology, anything goes!

Winners will be selected in the following grade categories: K-2, 3-5, 6-8, 9-12

WINNING ENTRIES WILL BE
HONORED AT A SPECIAL
CEREMONY AT DISCOVERY PLACE
ON APRIL 29, 2018!

***** DEADLINE FOR SUBMISSIONS IS APRIL 10, 2018. *****

For more information, including the Official Contest Rules & Guidelines and Entry Form, please visit SpandexCity.com/ScienceSuperheroes
