

SCIENCE & SUPERHEROES

Contest Sponsored By
Spandex City Comics
&
Discovery Place

Did you know that many of our favorite comic book superheroes owe their superpowers to science, technology, engineering, and math (STEM)?

The "Science & Superheroes" contest challenges students in grades K-8 to use the power of STEM to invent their own superheroes who solve real-world problems!

With imagination and research, you can rely on any field of STEM to come up with your character's origin and/or superpower. You might discover an existing technology that has a superheroic application. Perhaps a known math or scientific principle inspires you to create something new! From algebra to zoology, anything goes!

Winners will be selected in the following grade categories: K-2, 3-5, 6-8. The Grand Prize winner (across all grades) will receive a Discovery Place membership, a \$50 Spandex City Comics gift certificate, and 4 VIP passes to the Charlotte advance screening of "The Avengers" movie!

THE FIRST 100 ENTRIES
WILL RECEIVE A FREE
ATOMIC ROBO COMIC BOOK!

Deadline for submissions is March 24, 2012.
